Gary E. De la Cruz

Springfield, MA | 413-309-5520 | gary4gld@gmail.com | LinkedIn | garydelacruz.dev

Professional Summary

Full-Stack Software Developer with hands-on experience designing and delivering scalable integrations between enterprise systems and government platforms. Specializes in **.NET, Azure (Logic Apps & Functions), TypeScript frameworks,** and **ERPNext**. Proven track record building compliance-critical production systems — including a complete DGII e-CF electronic invoicing pipeline — and collaborating effectively within Agile teams across cross-functional environments.

Education

Westfield State University 2017 – 2020
B.S., Computer Science | Minor, Mathematics

Springfield Technical Community College 2011 – 2015
A.S., Computer Systems and Technology

Work Experience

Neural Software Solutions, SRL – Santo Domingo, Dominican Republic
Full-Stack Software Developer | 2023 – Present

- Developed and maintained web applications using Angular, TypeScript, and .NET, ensuring scalable, efficient, and maintainable code.
- Designed and implemented RESTful APIs and backend services using Entity Framework and C#, improving server-side performance.
- Managed SQL databases and automated deployments using Docker and Microsoft Azure.
- Collaborated with cross-functional teams under Agile methodology, participating in code reviews, sprint planning, and requirement analysis.
- Architected and delivered a production-grade DGII e-CF electronic invoicing compliance system integrating ERPNext, Azure Logic Apps, and Azure Functions — covering all 10 supported invoice types, automated XML payload generation, dual-path government API submission, and real-time invoice status tracking, ensuring full regulatory compliance and data security.

Internship Experience

OpenActuary Project – Westfield State University
Software Developer Intern / Scrum Master | 2020

- Contributed to the design and development of an online examination system, still active at openactuary.org.
- Worked across database management, backend, frontend, and API integration using Node.js and React Native.
- Facilitated Agile sprints as Scrum Master, ensuring clear communication, prioritization, and on-schedule delivery of key features.

Projects

ERP System & Electronic Invoicing 2024 – Present

- Designed and delivered a full DGII e-CF electronic invoicing compliance system supporting all 10 government-mandated invoice types (E31–E47), integrating ERPNext with Azure Logic Apps and Azure Functions for automated XML generation, Liquid/XSLT payload transformation, and government API submission.
- Implemented real-time invoice status tracking, multi-tenant ERPNext support, and an OCR-based invoice ingestion pipeline using Azure Document Intelligence — significantly reducing manual data entry and compliance risk.
- Built front-end components in Angular 17 and designed Azure-hosted workflows to automate and streamline business invoicing operations end-to-end.

Drone Automation Project 2023

- Designed and implemented a drone automation system using .NET and Java for flight control and system integration.
- Developed a real-time monitoring dashboard with Svelte and integrated AI-based tools for flight path optimization and data processing.
- Collaborated on end-to-end testing, debugging, and full-stack deployment of the complete solution.

Technical Skills

Programming Languages: C#, JavaScript, TypeScript, Python, C++, Java
Frameworks & Technologies: .NET, Angular, React, Node.js, Svelte, ERPNext, Azure Logic Apps, Azure Functions
Databases: SQL Server, MySQL, SQLite, Azure Table Storage
Cloud & DevOps: Microsoft Azure, Docker, Azure Document Intelligence, Azure Functions
Development Tools: Git, Postman, Visual Studio, VS Code
Methodologies: Agile / Scrum, SDLC, RESTful API Integration, Cloud Services
Other: Detail-Oriented, Communicative, Adaptable, Team Leadership

Certificates

JavaScript, React, Java, Version Control, Kotlin, Android Development Basics

Languages

English: Fluent
Spanish: Native
